RoHS-Directive, REACH-Regulation, POPS and Conflict Minerals

General declaration

Due to the abundance of question and customer-specific forms on these topics, we have decided to issue a general declaration.

This is an opportunity to inform you as a customer about our company guidelines and the obligations of our suppliers and manufacturers.

The RoHS Directive 2011/65/EU, as amended by Commission Delegated Directive (EU) 2015/863, restricts the use of certain hazardous substances in electrical and electronic equipment.

Elproman AB works with its suppliers and manufacturers to address the following regulations and requirements across our product portfolio, where applicable:

- RoHS Directive 2011/65/EU, as amended
- REACH Regulation (EC) No 1907/2006
- POPs Regulation (EU) 2019/1021
- Conflict minerals

The regulated substances in the RoHS directive are:

- Lead (Pb)
- Mercury (Hg)
- Cadmium (Cd)
- Hexavalent chromium (Cr VI)
- Polybrominated biphenyls (PBB)
- Polybrominated diphenyl ethers (PBDE)
- Bis(2-ethylhexyl) phthalate (DEHP)
- Benzyl butyl phthalate (BBP)
- Dibutyl phthalate (DBP)
- Diisobutyl phthalate (DIBP)

RoHS exemptions – Lead (Pb)

Certain products in our portfolio may contain lead as an alloying element in aluminium or copper alloys.

Exemption 6(b): Certain aluminium alloy components may contain lead up to 0.4% by weight, subject to the applicable conditions and validity periods.

Exemption 6(c): Certain copper alloy components, including brass components used in electrical connectors and cord sets, may contain lead up to 4% by weight, subject to the applicable conditions and validity periods.

These exemptions are specified in Annex III to Directive 2011/65/EU, as amended by Commission Delegated Directive (EU) 2025/2364.

The applicability of these exemptions depends on the material composition, intended application, product category and relevant validity period.

REACH – Substances of Very High Concern (SVHC)

Certain products in our portfolio may contain substances listed on the REACH Candidate List of Substances of Very High Concern (SVHC), including lead in certain metal alloys.

We work closely with our suppliers to obtain relevant information regarding SVHC substances and applicable regulatory requirements. Where substances are present above 0.1% by weight in an article, relevant information is communicated to customers in accordance with REACH Article 33. Where applicable, SCIP notifications are submitted in accordance with the relevant EU requirements.

Complete Candidate List: https://echa.europa.eu/candidate-list-table

Persistent Organic Pollutants (POPs)

Compliance with Regulation (EU) 2019/1021 on persistent organic pollutants (POPs) is required from our suppliers. Relevant product information is obtained from suppliers where necessary.

Conflict Minerals

We support responsible sourcing of minerals and work with our suppliers to obtain relevant information regarding the origin of tin, tantalum, tungsten and gold (3TG), where applicable. Supplier declarations and available documentation form the basis of our assessments.

Supplier Compliance and Product Information

Elproman AB requires its suppliers and manufacturers to comply with applicable regulatory requirements and to inform us of any substances or exemptions that require declaration.

We work closely with our suppliers to obtain relevant product information and communicate it to our customers when required. Our aim is to ensure that the products we supply meet applicable regulatory requirements and our customers' specifications.

Product-specific information can be provided upon request, subject to supplier documentation. Any product-specific exemptions or additional requirements will be addressed individually and communicated to the customer where applicable.

If you have any questions or require further information, please do not hesitate to contact us.

Sincerely yours,

Segeltorp 2026-10-27
